PREFACE

This concordance to Beowulf was prepared some years ago, as the first instalment of a projected concordance to the complete extant remains of Old English poetry. As that larger compilation has not in the mean time been made, there seems no sufficient reason for longer withholding from publication a book which ought to prove useful to those who seriously occupy themselves with this remarkable poem.

Certain of the commoner words have been disregarded. These are the numerals, prepositions, and many pronouns, besides the following, with their various inflectional forms where such occur: *ac, ǣnig, ǣr, and; cweðan; eal, eft; forðām; ge, gēn, gif, git; habban, heonan, hēr, hider, hū, hwǣr, hwanon, hwider; innan, inne; mon, monig, monn; nā, nabban, nǣnig, nales, nān, ne, nefne, nellan, nesan, nō, nū; oft, oð, ōðer, oððe; sculan, self, siððan, sōna, sum, swā, swilc, swilce; ðǣr, ðæt, ðanon, ðēah, ðenden, ðider, ðonne; uppan, uppe, ūtan; wel, weorðan, wesan, willan.*

The text is that of Wyatt's second edition (Cambridge, 1898). In compounds, however, the hyphen is omitted, and the punctuation is sometimes modified, where the omission of words from the text seems to demand it.

The progress of scholarship will certainly result in a better text, and perhaps may already have done so; but it is hardly necessary to say that concordances, lexicons, and grammars must deal with the texts in existence when they are compiled.

The quotations are by no means uniform in length, and greater uniformity might have been attained by sufficient effort; but perhaps this fault is negligible. Here and there a false concord, or the appearance of such, will doubtless be discovered; but I present the work, with such defects as it has, in the hope that it may be of service to other students of the early speech and literature of England.

YALE UNIVERSITY, December, 1910.
